VALUE ADDED COURSE [Mushroom Cultivation]

Summary Report

Entrepreneurship is important skill, as it has the capacity to improve standards and principle of living and create wealth, not only for the entrepreneurs but also for related businesses and to the society. Entrepreneurs also help to make changes with innovation, where new and improved products can be developed. Hence the curriculum enrichment course launched as value added course entitled 'Mushroom cultivation' was introduced by Department of Zoology for the academic year 2020-21. This course was offered to B.Sc Third year students. The course on Mushroom cultivation motivates and makes students to become good entrepreneurs.

The thirty hours course was designed by the faculty members of Zoology. It dealt with different aspects of mushroom cultivation technology including the understanding of mushroom biology, nutritional and medicinal values and detailed culture techniques. 32 students have successfully completed the course. Certificates were issued to the students after the successful completion of the course.

Outcome of the value Added Course

- ✓ The course helps to develop the skills of Mushroom cultivation
- ✓ Allow the students for overall management of the diseases and pests of mushrooms.
- ✓ Student learn to find a way of self-employment and income generation

DEPARTMENT OF SOCIOLOGY (2020-21)

Certificate course on Research Methodology

Summary report :-

Summary of this course to pay attention to the most important dimension of Research i.e. Research Methodology. It will enable the Researchers to develop the most appropriate methodology for their Research Studies. The mission of the course is to impart research skills to the beginners and help improve the quality of Research by the existing researchers.

The Course Structure is designed in a way that the learning of Research Methodology can move from a teaching process to an experimental process, from memorizing to brainstorming, from clearing the examination to feedback learning, from knowledge transfer to knowledge creation, from competitive learning to collaborative learning. The Participants of the Course will start the course by reading the provided literature at the end of the course they will find themselves equipped enough to author a book or two themselves. This is a Certificate Course based on the Thirteen Hours and the Duration of Course. This course is now available in all the major languages. Study Material can also be provided.

Certificate course on Research Methodology is taught by Dr.B.M.Patil, Department of Sociology, KLE Society's B. K. Arts, Science and Commerce College, Chikodi. 15 B.A. students were benefited from the course. The course could run for about 6 weeks right from 15/02/2021.

Outcomes:-

Students who successfully complete this course will be able to:

1. Discuss different methodologies and techniques used in research work.
2. Explain basic computer skills necessary for the conduct of research.
3. Assess the basic function and working of analytical instruments used in research
4. Propose the required numerical skills necessary to carry out research.

PG Department of Commerce & Management
Value added Course: **Employability Skills (2020-21)**

Summary Report

Employability skills are personal qualities that make a person "Employable". They are sometimes called "Soft skills" or "Transferable skills" because they are separate from technical knowledge and work experience and can be applied to almost any job, in any industry. In today's competitive job market, it is important to stand out. Employability skills can help the students to do that. While having a good degree in relevant subject it is certainly important to acquire some soft skills to find a good job and having successful career. In the view of this P.G. Department of Commerce & Management has introduced Value Added Course in Employability Skills to the M.Com Students.

26 students were enrolled to this course. The duration of the course was 30 hours. Shri. S. M. Bhosage and Shri. V.S. Khot were the course Co-ordinators and also taught this course. The course started on 01-02-2021. The examination was conducted in the Month of September, 2021 and all 26 students who were enrolled to this course were attended the examination.

Finally all 26 students who cleared the examination were awarded certificates.

Outcomes of the course

- Students can apply for any post in any industry as per their qualification is concerned.
- The students will be equipped to take decision relating to employment or entrepreneurship.
- Students will be able to face any interview with full of confidence.

Department of Computer Science

Certificate Course

Python for Data Science

Summary Report

The curriculum of the **Certificate Course** was framed and designed by the all the staff members of the department. The total number of students enrolled is 25. This course is being offered in order to train the B.Sc. students. This course is to enable the students to understand the fundamental concepts of Python programming for data science. This course is to get exposure with various aspects of programming knowledge. Its aims to train the students basic concept of Python programming. This course is based on current trends relevance and value in the job market.

Course Outcome:

1. This course enhanced the skill and competency of students in Python programming.
2. This course helped the students to get a job as Python programmer .

P. G. DEPARTMENT OF BOTANY

Certificate Course on Medicinal Plant Cultivation Techniques

SUMMARY REPORT

The supply base of 90% herbal raw drugs used in the manufacture of Ayurveda, Siddha, Unani & Homoeopathy systems of medicine is largely from the wild. This wild source is speedily shrinking day-by-day. Therefore, there is a need for conservation and sustainable use of medicinal plants. Cultivation is clearly a sustainable alternative to the present collection of medicinal plants from the wild. This can be a potential provider of returns to the farmers. The medicinal plants sector at present is not well organized and needs special attention. Although different Ministries and Departments in the Government sector, NGOs and individuals in the private sector are making efforts in different directions, yet there is a need to co-ordinate and systematise these efforts. An appropriate mechanism for coordination and implementation of policies relating to medicinal plants both at the national and state levels is necessary to facilitate inter-Ministry, inter-State and institutional collaboration to avoid duplication of efforts.

There is a huge demand for Medicinal plant products in various industries like Pharmaceuticals, Cosmetics, Health etc. According to our old Ayurvedic knowledge the most important treasures we have is our medicinal plants. There is no side effect reported as far and also they are available at low cost. Hence demand in the market is high from manufacturing industries. In this training module we provide training of cultivation as well as live demonstrations to increase participant's business aspects.

Opportunities for Medicinal Plant Cultivation:

- ✓ Widespread use of alternative medicine
- ✓ Profitable returns on sustainable basis

Advantages of Cultivation of Medicinal Plants:

- Generate employment in rural and urban areas
- Crops and technologies are farmer friendly and eco-friendly
- Low incidence with pest and diseases

The course is suitable for those students who are interested to study in Basic Science. Candidates must have the ability to apply skills for solving problems regarding recognition, harvest and preservation of medicinal plants, the control, distribution, purchasing of medicinal plant and derivatives.

Presently for the academic year 2020-21, 18 students are enrolled their names as listed below. The class was commenced from the month of April 2021.

List of students,

1. Ashwini Kakamari
2. Dhanashri Hiremath
3. Madhuri Bhivase
4. Masum Panwale
5. Megha Paramashetti
6. Pallavi Thorapatti
7. Rohini Tharapatti
8. Rutuja Patil
9. Shahida Desai
10. Shukruta Zhunjarawade
11. Soumya Shedbale
12. Swathi Tawadare
13. Vani Munnoli
14. Varsha Kagawad
15. Varsha Karagar
16. Vinaya Gharabude
17. Vijaykumar
18. Vinod Kuri

Further, the examination process will start in the month of August/September 2021 and the final results will be announced in the month of September 2021.

Certificate Course in "Sugar Technology"-2020-21

Summary:

The certificate course in Sugar Technology is conducted by department of Chemistry in association with Chidanand Basavprabhu Kore Sahakari Sakkare Karkane Niyamit(Sugar Industry), Chikodi. Dr. S. M. Patil and Mr. Shantinath Latthe of B. K. College, Chikodi were the resource persons for the conducting of the course under the guidance of Sugar Chemists from the Sugar Industry. 26 students of B.Sc course of our college have been benefited from the course. The course began on 1st March, 2021 and completed on 21st August, 2021.

Course Outcome

1. Students have been exposed to the Sugar science and Technology.
2. Students understood various terminologies used in sugar industry and the process of converting sugar juice to sugar crystal.
3. Students learnt operations of the instruments used in the sugar industries.

Department of English
Certificate course 2021-2022

Phonetics for Beginners – speech organs, the Alveolar ridge, the hard palate, the velum and glottis, the vocal cords, parts of the tongue, plosives, fricatives, nasals, lateral sound, vowels and classifications.

Summary Report of the certificate course:

The certificate course titled **Phonetics for Beginners**- speech organs, the Alveolar ridge, the hard palate, the velum and glottis, the vocal cords, parts of the tongue: the tip, the blade, the front of the tongue, the back of the tongue. Plosives, fricatives, nasals, lateral sound, vowels and its classification; was introduced for all the optional English students of B.A-I and II of the academic year 2020-2021

The course intended to teach the students, the identification of the English sounds, manner of articulation of consonant sound, the vowels, and transcription of words, words stress, syllable and intonation in detail. The students were motivated for correct pronunciation and intonation.

At the end of the course 50marks MCQ's mode examination was held for all the enrolled students and the papers were assessed, and provided them the certificates.

Outcomes of the Certificate Course:

Through this course the students were able to understand the importance of correct pronunciation; they become able to identify the English sounds like speech organs, alveolar ridge, hard palate, velum and glottis, vocal cords, parts of tongue with their correct usage during pronunciation. Students became aware of manner of articulation of consonant sounds like plosives, fricatives, affricates, nasals, lateral sounds, vowels with classification and also word transcription and stress, and this course made the students to understand and practice the correct intonation while pronouncing the words.

All the concepts related to the phonetics were explained in detail so we the faculty hope that this certificate course will help them in their upcoming days.

Summary Report

**Certificate Course in Accounting and Taxation
2020-21**

Accounting and taxation course is always of high demand as a person with great knowledge in account and tax plays a key role in all business sectors. By understanding the need of introducing the course the faculties of Department of Commerce have designed the syllabus as per the industry requirement and introduced the Certificate Course in Accounting and Taxation. This course is being offered to B. Com students during academic year 2020-21. Total 40 students have enrolled to the course. The syllabus has been taught and students are guided by Prof. N. B. Patil by conducting classes as per the time table. Classes were conducted from 1st February, 2021 to 6th August, 2021. As per the examination policy we have conducted an examination for 100 marks on 13th August, 2021. All 40 students have attended the final examination and completed the course successfully.

Following are the outcomes of the course;

Students are able;

- To understand the fundamentals and principles of accounting and taxation.
- To record financial transactions, prepare and analyze final accounts electronically.
- To compute taxable income.
- To apply for further education and training in the field.

Tally Accounting

Summary Report

The curriculum of the **Certificate Course** was framed and designed by the all the staff members of the department. The total number of students enrolled is 38. This course is being offered in order to train the B.Com. students. Tally is an accounting package which is used for learning to maintain accounts. As this course is useful for Commerce students to get placements in different offices as well as companies in Accounts departments.

Course Outcome:

- Session started with the introduction of Tally ERP-9 with its importance & features.
- Participants got practical exposure of this software while solving examples with the help of trainer.
- At the end of the programme, students were found confident towards using Tally ERP-9 software while solving practical problems. They were found trained in creating/selecting any company/group creating.
- Various concepts pertaining to formation of company & creation of different accounts under Tally ERP-9 was discussed in detail.
- A detailed lecture on accounts and voucher entries were discussed along with practice session on individual basis.
- The students were provided with the thorough knowledge about the Financial transactions involved in cost centre, Taxation, which comprised of TDS, VAT.

Certificate course: ChemDraw Software and its application

Summary:

Certificate course on Chemdraw and its application is taught by Shri.Prasad M. Palankar Department of Chemistry KLE'S BK Arts, Science and Commerce College Chikodi, 30 B.Sc final year students were benefited from the course. The course could run for about 8 weeks right from 20/01/2020 to 15/03/2020.

Outcome:

- 1.The students could draw the structures of organic molecules using the techniques taught to them during the classes.
- 2.The students could rejoice the learning and understanding the subject by means of technological tools which will help the students who join higher education.
3. Students could incorporated the technological aspects learnt through the course in presenting papers in seminars , symposia ect.
4. Course enables the students to draw the synthetic schemes of organic reactions.

SHORT TERM COURSE (2019 – 20)

ENVIRONMENT: Issues, management, environmental impact assessment, green practices, rainwater harvesting and waste management

Summary Report of the Short Term Course

The short term course entitled "ENVIRONMENT: Issues, management, environmental impact assessment, green practices, rain water harvesting and waste management" was introduced for the benefit of B.Sc Third year students of the academic year 2019 – 20.

The course was aimed to deal with the issues related to environment and overall management of the Environment with special emphasis on impact assessment. Total 27 students enrolled for the course. 30 hrs of syllabus was covered by the teaching faculties of the Department. During the course students were motivated to save the environment.

Due to COVID-19 pandemic situation a few online classes were conducted to complete the syllabus. 100 marks examination was also conducted online mode using Google classroom platform. All the 27 students completed the course and were provided with the certificates.

Outcome of Short Term Course

Students with great interest took part in the learning process. All the students were educated about various issues, impacts and human interference with the Environment. They also studied the significance and effects of renewable energy resources. Students were informed about the overall management of environment, ecotourism and use of alternate energy resources. Our objective was to introduce all the concepts of environment before they complete graduation. All the concepts related to environment were explained in details to the enrolled students.

All the students were made aware about the significance of environment including 'mother earth'. Faculty members have succeeded in making our students as "Warriors of Environment". We the faculty members hope that in the near future, our students benefited by this short term course, as citizens of the country will participate in motivational programmes related to 'Save environment'

VALUE ADDED COURSE – 'Principles and Techniques of Bioinstrumentation' (2019 – 20)

Summary Report of the Value Added Course

The course was designed to give basic knowledge of bioinstrumentation with the objectives to understand the basic laboratory safety measures, to learn the handling methods of analytical instruments and to understand the principle and applications of bio-instruments etc.

Seventeen students of B.Sc Second year registered for the value added course on 'Principles and Techniques of Bioinstrumentation' for the academic year 2019-20. Regular theory classes were conducted by faculty members and students learnt different instruments like balance, centrifuge, electrophoresis, chromatography etc.

Due to COVID-19 pandemic situation a few online classes were conducted to complete the syllabus. 100 marks examination was also conducted online mode using Google classroom platform. Assessment was carried out and all the students successfully completed the course. All the 17 students completed the course and were provided with the certificates.

Outcome of the Value Added Course

- ✓ The course helped the students to develop the skills in handling bio-instruments
- ✓ It allowed the students to learn laboratory safety
- ✓ The course helped students to build their career in Biochemistry, Biotechnology, Medical and Microbiology laboratories.

Short Term Course

OOP'S USING C++ [2018-19]

Summary Report

The curriculum of the Short Term Course was framed and designed by the all the staff members of the department. This course is being offered in order to train the B.Sc. students. This course is to enable the students to understand the **OOP'S using C++**. It is easy to model a real system as real objects are represented by programming objects in OOP. The objects are processed by their member data and functions. It is easy to analyze the user requirements. With the help of inheritance, we can reuse the existing class to derive a new class such that the redundant code is eliminated and the use of existing class is extended. This saves time and cost of program.

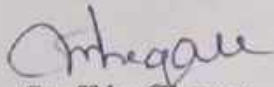

This course is to get exposure with various aspects of programming knowledge. The main aim of OOP is to bind together the data and the functions that operate on them so that no other part of the code can access this data except that function.

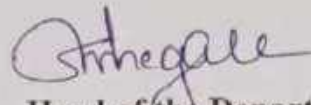

Course Outcome:

- Understand the difference between the top-down and bottom-up approach
- Explore polymorphism using Function and Operator Overloading.
- Describe the procedural and object oriented paradigm with concepts of streams, classes, functions, data and objects.
- Understand dynamic memory management techniques using pointers, constructors and destructors.

The curriculum of the Certificate Course was framed and designed by the all the staff members of the department. The total number of students enrolled is 61. This course is being offered in order to train the B.Com. students. This course is to enable the students to understand the fundamental concepts of accounting software. Tally will give a much needed boost to students career by enhancing your knowledge in Accounting, Inventory Management, and Taxation.

Course Outcome:

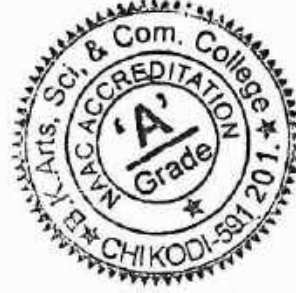

- Students learn the basics of tally and importance of tally in today's computerized environment.
- Students learn how to create company accounts using tally and about function keys and shortcut keys.
- To know about voucher entry, payment voucher, receipt voucher, credit and debit note.
- Students learn how to create single and multiple ledgers, group creation, budget, inventory groups and other functions.

Students learn to prepare final accounts in tally along with cash flow statements and inventory analysis reports

DEPARTMENT: MATHEMATICS

Certificate Course on Reasoning and Quantitative Aptitude

Summary Report:

The certificate course was conducted by the Department of Mathematics in the academic year 2017-18. On **18th Nov 2017**, the notice has been circulated among the students to enroll their name for the course so far **34** students have been enrolled for it and the classes are commenced on **23rd Jan to 11th April, 2018**. Conducted exam for 50 marks with the duration of 90 min and the certificate has been provided for the students who have scored 40% and above. This certificate course was designed to serves the purpose of a brief assessment to gauge the skills, abilities and knowledge of students. Particularly this course helps students who are preparing for any type of competitive examinations.

Course Outcomes:

- Develops their logical thinking ability and problem solving techniques
- Understand the basic concepts of Logical Reasoning
- Understand the basic concepts of Quantitative Aptitude
- Participate with confidence in various competitive exams like JAM, GATE, CAT, CMAT, UPSC, SSC, SDA, FDA, Army etc.
- Solve aptitude papers of campus placement
