Title of the Programme.	Special Lecture on Menstrual Hygiene Management
Resource Person	Dr. Spoorthi Mastiholi
Time & Date	12:30pm to 1:45pm 01/10/2019
Place	KLE Society's Basavaprabhu Kore Arts, Science and Commerce College Chikodi-591201 Karnataka
No. of Beneficiaries	80
Objectives	<ol style="list-style-type: none"> 1. To find out the prevailing practices for menstrual hygiene among adolescent girls. 2. To assess restrictions practiced by adolescent college girls during menstruation. 3. To ascertain the association of awareness of menstruation and practices for menstruation hygiene with educational status of respondents. 4. To assess the relative contribution of educational status of respondents of using unhygienic practices during menstruation.
Summary of the Programme:	<p>Menstrual cycles often bring about a variety of uncomfortable symptoms leading up to your period. Premenstrual syndrome encompasses the most common issues, such as mild cramping and fatigue, but the symptoms usually go away when your period begins.</p> <p>Menstruation that is too heavy or too light, or the complete absence of a cycle, may suggest that there are other issues that are contributing to an abnormal menstrual cycle.</p> <p>Remember that a "normal" menstrual cycle means something different for every woman. A cycle that's regular for you may be abnormal for someone else. It's important to stay in tune with your body and to consult your doctor. Cramps are normal during PMS and they also occur when your uterus contracts as your period begins. However, some women experience excruciating pain. Also called dysmenorrhea, extremely painful menstruation is likely linked to an underlying medical problem.</p>
